E-Induction

Student participation

Diagnose IT skills

Teach IT Skills

Peer support

Belonging

Student Participation

- format combines mixed approaches to teaching and learning which include a significant element of active student participation

Diagnose IT Skills

- making a pre-course diagnosis of students IT skills in order to establish students abilities to use course-related tools (for example, accessing the online library catalogue and e-journals, using databases)

Teach IT Skills

- including a hands-on IT session as part of the induction programme

Peer Support

- giving attention to developing social cohesion within the group and establishing the foundations for peer support networks

Belonging

- facilitating a sense of belonging to both the programme and the wider university.
